Never purchase another FCC database!

rfInvestigator-FM Professional edition can build databases *directly* from FCC downloads.

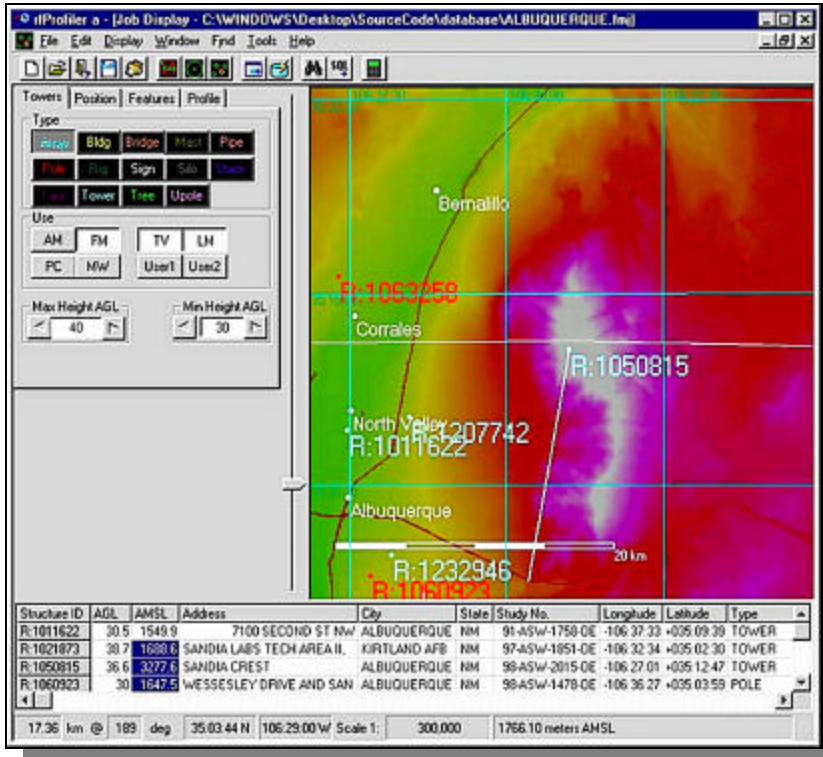

- Analyze STL / microwave paths with the Terrain Profiler.
- Calculate population within contours and contour overlaps.
- Includes 30-second terrain data, 3-sec available.

Draw full-color terrain or population density maps on the analysis screen.

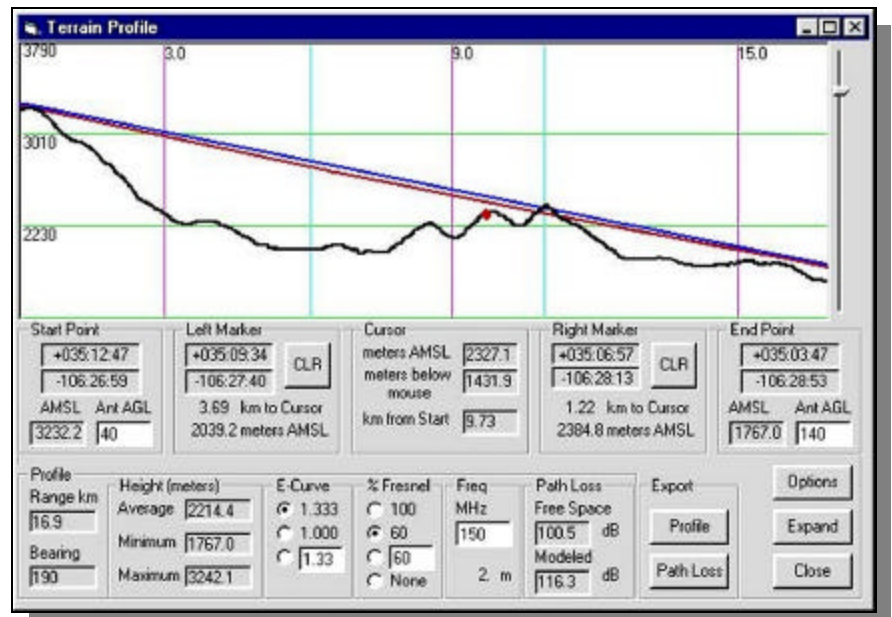

Our unique antenna pattern tool makes **DA design** a snap! Export your finished design for easy submission to antenna manufacturers.

Call for a free 30-day copy of *rfInvestigator-FM*

Display terrain profile, line of sight and Fresnel zone between two points. Perform free-space and Longley-Rice path loss calculations.

Export profile data to virtually any spreadsheet for further analysis.

Look for our newest product coming soon!

rfAnalyst-FM

You get all the features and power of rfInvestigator PLUS sophisticated propagation modeling and interference analysis.
